

H.O.D Super White - Halogen bulb 5500 K

Super white, slightly bluish light bulb with a shine and brightness similar to Xenon lamps. Its advantage over Xenon bulbs is that it requires neither conversion electronics nor complicated installation, and can be easily replaced with standard Halogen bulbs. Its use is completely legal!

H.O.D bulb means: HIGH OLIVE LAMP DEFINITIONS, refers to the shape of the bulb. It differs in size and shape from conventional bulbs, providing excellent brightness and better dissipation of the heat given off by the bulb, so it has a longer lifespan than similar bulbs with increased brightness.

Features:

- 5500 Kelvin
- 2.5X higher brightness than conventional halogen bulbs
- 2 bulbs / set
- 2300 Lumens brightness. (approx. 1000 lumens for conventional halogen bulbs)
- 350 operating hours.
- Excellent focused light scattering.
- It is important that it contains mixed gases, NOT ONLY XENON gas, thus providing very good vision at all times (snow, rain, fog).
- Porcelain socket.

The warranty is only valid for installation in a specialist workshop. We can only accept the installation with an invoice!
