Certificate: IP68, CE, ROHS

Aluminum alloy housing, steel brackets

Housing color: black

Warranty period: 6 months

Off Road Lamp Installation:

Read the instructions carefully before installation.

The lamp operates on direct current. To prevent damage to the light source, electrical wiring and / or power supply system, or to prevent other types of damage, the installation should only be performed by qualified personnel.

The power supply must be switched off during installation. When installing the lamp, there is a risk of electric shock when the power supply is turned on. Use the supplied fasteners and screws. Pay attention to the polarity.

The lamp can be switched on and off with a properly selected switch built into the power supply system.

(not part of the package)

Protect the lamp from the use of lubricants, solvents and substances that may damage the surface. This may reduce its brightness and lead to malfunction.

Before installation, make sure that the lamp is undamaged. If you find a fault, do not install the lamp, contact your dealer or distributor.

If you have any questions, feel free to contact your dealer or distributor.

Warning:

Do not direct a high-pressure water jet directly at the lamp

Do not use chemicals, clean the lamp with a damp sponge
