

SM01 Visszapillantó tükör behajtó motorvezérlés

Nominal voltage: 12±2V

The module is not suitable for manual (hand) operation of rearview mirrors. It can be installed in vehicles that have rearview mirror motors.

When the ignition switch is turned ON, the mirrors will automatically open. When the vehicle is parked, the mirrors will automatically retract.

The module can be connected to the vehicle's alarm system. The two mirrors will close when the alarm is triggered.

Warranty condition: installation by a specialist service.
