

Heated seat cover 24V

Please read the following instructions carefully before use! Failure to follow the instructions may result in electric shock, fire and damage to property! Keep the instructions in a safe, easily accessible place. If you pass the product on to a third party, add this guide as well!

- Use the device only as described in the instructions! The distributor is not liable for any damage resulting from non-observance of the instructions!
- Attention! There is no switch on the device. By connecting it to the cigarette lighter, the seat heater is energized and the heating filaments start to heat up! The appliance is switched off by pulling the plug out of the socket. Never pull the cord!
- Never leave the appliance unattended during operation (plugged in)!
- Always remove the plug when getting out of the car! In some vehicles, the socket remains live when the engine is stopped, so the seat heater continues to operate. You may drain the car battery or you may not be able to respond to any malfunction.
- Secure the seat cover securely and securely. Route the power cord so that it does not interfere with driving. Secure the device so that it does not pose a risk of collision or breakage.
- Be careful not to crease the seat cover, as the heating wires inside it may be damaged and cause a short circuit.
- Only use a completely intact device! Do not use the appliance if any of its parts are damaged! Always entrust the maintenance work of the device and the replacement of parts to a specialist!
- Keep the appliance out of the reach of children. Children do not understand or recognize the potential risks associated with the use of electrical appliances.
- The product is designed for human use. It is not suitable for heating or keeping animals warm, its use in this direction is prohibited!
- Do not use the product if you have a pacemaker!
- Using the seat heater for too long may drain the battery (when the engine is not running).
- Can only be operated from a 24 Volt mains supply!
- Do not expose the device to rain or wet conditions. Be careful not to splash water on the appliance. Before use, make sure that the plug and cord are not wet. Never switch on the appliance with wet, damp hands! Do not use the appliance if it is soaked! Electric shock is dangerous!
- The appliance is only designed for indoor use!

Insertion

Seat heating can be easily installed in virtually any type of car seat. Place the seat cushion on the car seat. Use the elastic traps to secure the product to the back of the seat, and then hook the hook straps under the seat or at the bottom of the seat.

Use

To use (switch on), simply plug the product into the cigarette lighter socket (after secure mounting). There is no switch on the appliance, after connecting it to the cigarette lighter socket, the heating filaments start to heat up. You can switch off the appliance by pulling the plug out of the socket. Never operate the product unattended!

Care, maintenance

The product is fused. You can also replace it. Replace a blown fuse only with a fuse of the same type (glass) or with the same data (Amperes)!

Cleaning

Wipe clean with a cloth slightly moistened with lukewarm water and warm water. Make sure that no moisture gets inside the device and the connector. Only use the product again after it has dried completely.
